this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1901 edition excerpt chapter iii definition of certitude and of the states of mind falling short of certitude synopsis 1 definition of certitude 2 the question at present is one rather of definition than of fact 3 definitions of the states of mind which fall short of certitude a ignorance i doubt c suspicion i opinion 4 probability a very large subject not here discussed at any length 5 the use of the word belief i the assured possession of truth by the intellect is called certitude which is therefore denoted to be the state of the mind when it firmly assents to something because of motives which exclude at least all solid reasonable misgivings though not necessarily all misgivings whatsoever the definition applies not only to every truth which is reached mediately by inference but also to immediate intuitive truths of which the motive lies simply in the self evident connexion of the given terms hence it is not always needful to look for a motive outside of the judgment itself 2 such is a short description of what those competent to speak on the matter commonly understand by certitude it is not yet formally under discussion whether we mortals can arrive at such a state though that we can is implied in every pretence to rational discussion of any sort still as far as explicit declaration is concerned just as in an earlier chapter it was enough to say hypothetically that if we have knowledge it will bear a resemblance to the thing known so now it suffices to say that if we have certitude it must be as above defined positively however to allow that we may perhaps be devoid of all certitude in our knowledge and that we must wait for philosophy to settle the doubt this would be to cut from under our feet

this element provides a pedagogical overview of the history of knowledge including its main currents distinguishing ideas and key concepts however it is not primarily a state of the art overview but rather an argumentative contribution that seeks to push the field in a certain direction towards studying knowledge in society and knowledge in people's lives hence the history of knowledge envisioned by the authors is not a rebranding of the history of science and intellectual history but rather a reinvigoration of social and cultural history this implies that many different forms of knowledge should be objects of study by drawing on ongoing research from all across the world dealing with different time periods and problems the authors demonstrate that the history of knowledge can enrich our understanding of past societies this
