pithy direct and bold essays that propose new ways to think about old problems spanning a range of philosophical topics in philosophical

provocations colin mcginn offers a series of short sharp essays that take on philosophical problems ranging from the concept of mind to paradox altruism and the relation between god and the devil avoiding the usual scholarly apparatus and embracing a blunt pithiness mcginn aims to achieve as much as possible in as short a space as possible while covering as many topics as possible much academic philosophical writing today is long leaden citation heavy dense with qualifications and painful to read the essays in philosophical provocations are short direct and engaging often challenging philosophical orthodoxy as they consider issues in mind language knowledge metaphysics biology ethics and religion mcginn is looking for new ways to think about old problems thus he writes about consciousness i think we have been all wrong and goes on to suggest that both consciousness and the unconscious are mysteries summing up his proposal on altruism he remarks my suggestion can now be stated somewhat brutally as follows human altruism is the result of parasitic manipulation he takes a moment to reflect i really don t know why it is good to be alive though i am convinced that the standard suggestions don t work mcginn gets straight to the point and states his position with maximum clarity these essays offer provocative invitations to think again

with the publication of the parerga and paralipomena in 1851 there finally came some measure of the fame that schopenhauer thought was his due described by schopenhauer himself as incomparably more popular than everything up till now the parerga is a miscellany of essays addressing themes that complement his work the world as will and representation along with more divergent speculative pieces it includes his aphorisms on the wisdom of life reflections on fate and clairvoyance trenchant views on the philosophers and universities of his day and an enlightening survey of the history of philosophy the present volume offers a new translation a substantial introduction explaining the context of the essays and extensive editorial notes on the different published versions of the work this readable and scholarly edition will be an essential reference for those studying schopenhauer the history of philosophy and nineteenth century german philosophy

great thinkers in 60 minutes volume 4 comprises the five books schopenhauer in 60 minutes nietzsche in 60 minutes wittgenstein in 60 minutes kafka in 60 minutes and arendt in 60 minutes each short study sums up the key idea at the heart of each respective thinker and asks the question of what use is this key idea to us today but above all the philosophers get to speak for themselves their most important statements are prominently presented as direct quotations in speech balloons with appropriate graphics with exact indication of the source of each quote in the author s works this light hearted but nonetheless scholarly precise rendering of the ideas of each thinker makes it easy for the reader to acquaint him or herself with the great questions of our lives because every philosopher who has achieved global fame has posed the question of meaning what is it that holds at the most essential level the world together for schopenhauer it is the blind will that

drives on every entity in the world for nietzsche it is will to power that urges human beings to a radical individual realization of the self wittgenstein for his part sees in language and our day to day language games the central element that marks our existence and society as a whole kafka by contrast discovered a very secret and fragile dimension of our lives the dimension of inter human relations and this relation s dark side arendt finally provides us with her thesis of the banality of evil a marvellous insight into the morality and amorality of entire societies in other words the meaning of the world and thus of our own lives remains among philosophers a topic of great controversy one thing though is sure each of these five thinkers struck from his own perspective one brilliant spark out of that complex crystal that is the truth

scientists rarely take paranormal experiences seriously furthermore in the recent past the concept of the paranormal did not even exist in philosophy william james who extensively studied mediumistic phenomena labelled them wild beasts of the philosophical desert this book demonstrates that to important philosophers from kant to derrida controversial phenomena like telepathy and clairvoyance were serious topics the authors of this collection have studied relevant texts that have hitherto received little attention and illustrate how each of the philosophers in question thoughtfully interpreted exceptional experiences that seem to go beyond our understanding

schopenhauer is renowned as the greatest most brilliant pessimist among philosophers he was the first to discover that our lives and world history are governed not by reason or rational planning but rather by the same blind hungry will as drives the lives of animals and plants instead of reason says schopenhauer there rules as the basic metaphysical principle just the the blind will appearing as the tendency to life the love of life vital energy the same thing as makes the plant grow because every being on earth is filled with this blind will and needs in order itself to live to find its place in the sun by pushing other beings aside persecuting and hunting them devouring them and itself fearing being devoured even the majestic lion stands on a mountain of corpses to which he owes his existence but worst of all are human beings who inflict pain both on animals and on each other they use their intelligence to systematically exploit build factories lock animals in cages and stalls and fight wars for land and materials like the buddhists schopenhauer concludes that life necessarily means suffering every life story is a story of suffering he writes and like the buddhists too he draws a radical conclusion we must say no to life and resists its pressure by means of art asceticism and meditation but what does it mean to say no to life if our lives are indeed just a devouring and being devoured under the impulse of blind will how can we ever escape this fate of what use is a pessimism like schopenhauer s today schopenhauer provides uncompromising answers to these questions that still fascinate us two hundred years on his key ideas are presented here with the

aid of over a hundred quotations from his finest work the book appears as part of the popular series great thinkers in 60 minutes

this book explores the nature of political correctness as but one of the faces of today's widespread sociocultural hypocrisy it is a critique of a phenomenon that constitutes a threat to the enlightenment hope that humanity might one day achieve maturity the author identifies political correctness as a drive towards shallowness anti intellectualism and self flagellation and a culture in which perception is everything with attention to the emergence and growth of political correctness in a country greece where it can be observed from a bottom up perspective this volume demonstrates that although at first glance it appears as a well intentioned social movement informed by values with which no moral and judicious person could disagree political correctness actually represents at best a distraction from graver concerns at worst a manifestation of human foolishness and malevolence a study of the destruction of honest and rational debate characterized by trials of intention often by social media political correctness a sociocultural black hole will appeal to scholars of sociology and media studies with interests in contemporary political culture
