although there are many studies of certain individual ancient italic groups e g the etruscans gauls and latins there is no work that takes a comprehensive view of each of them the famous and the less well known that existed in iron age and roman italy moreover many previous studies have focused only on the material evidence for these groups or on what the literary sources have to say about them this handbook is conceived of as a resource for archaeologists historians philologists and other scholars interested in finding out more about italic groups from the earliest period they are detectable early iron age in most instances down to the time when they begin to assimilate into the roman state in the late republican or early imperial period as such it will endeavor to include both archaeological and historical perspectives on each group with contributions from the best known or up and coming archaeologists and historians for these peoples and topics the language of the volume is english but scholars from around the world have contributed to it this volume covers the ancient peoples of italy more comprehensively in individual chapters and it is also distinct because it has a thematic section

the papers of this volume focus on the sacred landscapes of ancient sicily religious and cultural dimensions of greek sanctuaries are assessed in light of the results of recent excavations and new readings of literary sources the material dimension of cult

practices in ancient sanctuaries is the central issue of all contributions with a focus on the findings from ancient akragas great attention is also paid to past ritual activities which are framed in three complementary areas of enquiry firstly the architectural setting of sanctuaries is examined beyond temple buildings to assess the wider context of their structural and spatial complexity secondly the material culture of votive deposition and religious feasting is analysed in terms of performative characteristics and through the lens of anthropological approaches thirdly the significance of gender in cultic practice is investigated in light of the fresh data retrieved from the field the new findings presented in this volume contribute to close the existing research gaps in the study of sanctuaries in sicily as well as the wider practice of greek religion
